Dallas Deas

(770)-652-5896 | dallasjdeas03@gmail.com | linkedin.com/in/dallas-deas | dallasdeas.github.io | Security Clearance: TS/SCI — In Processing (DoD) | Army National Guard Officer Candidate | Open to Relocation

Professional Summary

CCNA, CompTIA Security+, and Microsoft Azure Fundamentals certified IT support professional with over 2 years of combined customer-facing experience. Experienced in troubleshooting Windows, mobile devices, network connectivity, and business applications, with hands-on lab experience in Active Directory and Windows Server.

Certifications

CompTIA Security+ (SY0-701) | **Cisco Certified Network Associate (CCNA)** | **Microsoft Certified: Azure Fundamentals (AZ-900)**

Technical Skills

Networking: TCP/IP, DNS, DHCP, IPv4/Subnetting, VLANs, Cisco IOS, OSPF, ACLs, NAT/PAT, Wireshark

Systems & Support: Windows 11, Windows Server 2022, Active Directory, Microsoft 365, Hyper-V, Hardware/Software troubleshooting, User Support

Cloud & Identity: Microsoft Azure, Entra ID, IAM, RBAC, Security Groups, Resource Groups

Automation & Data: PowerShell, Python, Power Query, Power Pivot, Microsoft Excel

Professional Experience

Help Desk Analyst October 2026 – Present

Telrite Holdings Atlanta, GA

- Provide **Tier 1 technical support** in a high-volume call center, troubleshooting iOS/Android devices, hardware/software issues, SIM/eSIM activation, and mobile voice, SMS/MMS, and data connectivity.
- Diagnose **wireless network connectivity issues** involving APN configurations, Wi-Fi calling, hotspots, network settings, and service provisioning; escalate complex technical incidents to Tier 2 support.
- Manage technical support tickets through **CRM/ticketing systems**, documenting troubleshooting steps, resolutions, and escalations while adhering to service-level agreements (SLAs) and quality standards.
- Provide user account management and technical service support, including account verification, SIM swaps, device compatibility, and payment processing while adhering to **CPNI privacy requirements and PCI DSS payment security procedures**.

Manufacturing Staff Accountant July 2025 – February 2026

Piana Technologies Atlanta, GA

- Administered Global Shop Solutions (GSS) ERP, configuring production workflows and managing data integration between GSS, Microsoft Excel, and external platforms to support reliable cross-system operations.
- Automated reporting and variance-detection workflows using Power Query, Power Pivot, XLOOKUP, and advanced Microsoft Excel, reducing month-end close from 20 days to 10 days while improving data accuracy and operational efficiency.
- Managed IT asset lifecycle and inventory for computers, scanners, and printers, maintaining hardware records from acquisition through depreciation and retirement as the sole asset administrator.
- Delivered end-user training and application support for GSS, troubleshooting workflow issues and collaborating across departments to improve system adoption and business-process integration.

IT Support Specialist & Tax System Administrator August 2024 – January 2025

The Tax Corner Acworth, GA

- Configured and supported office network infrastructure and 5 Windows workstations running Drake tax software, troubleshooting network connectivity, application access, and workstation performance during peak tax-season operations.
- Delivered Tier 1 end-user technical support, diagnosing and resolving Windows, authentication, software, application, and network connectivity issues, typically resolving issues within approximately 30 minutes.
- Supported and administered Drake tax software and electronic filing workflows, troubleshooting user access, application, and processing issues involving sensitive client data (1099, W-4, and W-9 documentation).
- Implemented a patch management workflow across Windows workstations and business applications, maintaining system updates to improve endpoint security, application stability, and operational reliability.
- Developed and maintained an automated encrypted backup process protecting 400+ client records, performing daily backups and data-integrity validation to support secure recovery and business continuity.

Technical Projects

Network Infrastructure Lab | *Cisco Packet Tracer* | dallasdeas.github.io Present

- Designed and configured a four-VLAN enterprise LAN using Cisco IOS, inter-VLAN routing, OSPF, 802.1Q trunking, EtherChannel (LACP), DHCP relay, NAT/PAT, ACLs, and SSHv2 to establish segmented connectivity and secure network device management..

Active Directory Home Lab | *Hyper-V, Windows Server 2022, Active Directory Domain Services* | dallasdeas.github.io Present

- Deployed a virtualized Windows Server 2022 Active Directory (AD DS) environment with DNS and a domain-joined Windows 11 workstation; administered users, security groups, and organizational units (OUs) while troubleshooting DNS and VM configuration issues.

Microsoft Azure Cloud Lab | *Microsoft Azure, IAM, Entra ID, RBAC* | dallasdeas.github.io Present

- Implemented least-privilege identity and access management (IAM) using Microsoft Entra ID, security groups, and Azure RBAC permissions; configured Azure Cost Management budgets and automated alerts to support cloud governance.

Military Service

Army National Guard - Officer Candidate February 2026 - Present

- Selected for **Officer Candidate School** with interest in pursuing the **Signal Corps (25A)**, supporting **communications and network infrastructure operations**.
- **Security Clearance: TS/SCI (in processing)**.

Education

Young Harris College Young Harris, GA

Bachelor of Science in Finance and Accounting (Business Analytics), Minor in Management August 2021 – May 2025

Cumulative GPA: 3.1 | *Zell Miller Scholarship* | *Athletic Scholarship* | *Dean's List: Fall 2024, Spring 2025*
